

ETERNAL X & WILTING Y

Wild Pokémon Locations

This document contains the encounter rates for each area with wild Pokémon in the games. Areas are listed in the order that they become accessible. There are no version exclusives or differences, so this applies to both games. All 721 Pokémon are obtainable somehow, which unfortunately leads to some awkward legendary encounters (see Victory Road) due to the absence of script editing. If a Pokémon isn't listed here, it may be exclusive to things like trash cans or cave ceilings. Unfortunately these can't be edited just yet, so these encounters – including their levels – are all the same as the vanilla games.
